BHUKKAD / RESTAURANT OS

Bhukkad

BRAND GUIDELINES

A warm, high-velocity identity system for modern dining rooms, kitchen teams, and operators who need service clarity at every touchpoint.

DIRECTION	FONTS	SOURCE

Warm precision

Premium but grounded

01 / BRAND CORE

Bhukkad feels like service rhythm made visible.

Bhukkad is a restaurant operating system that should feel fast, confident, and hospitality-led without drifting into generic SaaS coldness. The brand sits between the urgency of a live service floor and the calm structure that operators need to make decisions quickly.

The visual system should always read globally polished first. Its Indian influence comes through warmth, spice-toned contrast, menu richness, and tactile surfaces rather than overt motifs or themed decoration.

Warm precision

Operational control with hospitality warmth still intact.

Premium but grounded

Richer surfaces, stronger contrast, no ornamental excess.

Service rhythm

Clear hierarchy, sharp movement, calm under live pressure.

Subtle cultural depth

Spice warmth and sensory richness without visual cliches.

DIRECT · UPBEAT · PRACTICAL · CONFIDENT

"Built for hungry dining rooms, fast kitchens, and operators who need service clarity."

02 / COLOR SYSTEM

Spice-led warmth anchored by clean operational neutrals.

Light system

Current live tokens

Primary	Primary dark	Primary light	Tertiary

Primary	Primary strong	Primary container	Tertiary
#FF7A33	#FFB089	#7A2E0C	#4FD1C5

Foreground	Background	Surface	Border
#F8FAFC	#0F1117	#161B22	#334155

Brand primary	Use for CTAs, service-state emphasis, and directional momentum.
Surface hierarchy	Use layered neutrals for density, never raw grey utilities.
Tertiary freshness	Use sparingly for analytics accents, confirmations, and balance.
Utility states	Keep success, warning, and error warm enough to belong in hospitality.

03 / TYPOGRAPHY AND SHAPE

Editorial headlines, dense operational body copy, tactile geometry.

DISPLAY / SORA

Fast kitchens. Calm service. Clear decisions.

BODY / MANROPE

Manrope carries the dense product layer: tables, forms, menu metadata, kitchen states, payments, and service detail. It should feel clean, human, and highly readable under pressure.

Elevation 3

Brand glow

04 / PRODUCT EXPRESSION

The interface should feel premium hospitality, not orange on enterprise grey.

DASHBOARD HERO

High signal. Low panic.

Hero areas use layered surfaces, controlled glow, and composed typography to help operators process the room without visual noise.

ACCENT RULE

Brand orange leads action. Tertiary teal balances analytics and confirmation. Saturated backgrounds should be rare and purposeful.

05 / LIVE PRODUCT REFERENCES

Reference screens taken from the refactored product surface.

06 / GUARDRAILS

Consistency comes from restraint as much as expression.

Do

- Use semantic surface tokens instead of raw utility greys.
- Keep primary orange for action, urgency, and intentional focus.
- Use larger radii on hero panels, cards, and high-value interactions.
- Let Sora punctuate brand moments, not dense operational copy.
- Use freshness accents to stabilize dashboards, not overpower them.

Avoid

- Enterprise slate chrome with an orange button dropped on top.
- Random chart colors that have no semantic or service meaning.
- Overusing gradients, glow, or saturated blocks as decoration.
- Mixing hard-edged components with the rounded Bhukkad surface system.
- Turning cultural cues into themed or stereotype-heavy motifs.

Canonical implementation source: `app/globals.css`, `components/ui/`, and the current Bhukkad application shell. This document is the presentation layer for that system.
